Websites, web applications and dashboards, designed and built end to end. Every project is scoped in writing before it starts, quoted at a fixed price for that scope, and delivered with the code and accounts in your name.

ENGAGEMENTS

PACKAGE	WHAT IS INCLUDED	TIMELINE
Marketing site	Up to five pages, design and build, copy layout, contact forms, analytics and SEO basics.	3–4 weeks
Web app	Product interface, accounts, database, API, payments where needed.	5–8 weeks
Dashboard	Data ingestion from up to three sources, reporting screens, CSV export, role-based access.	5–7 weeks
Ongoing work	A reserved block of hours each month for fixes, new pages and improvements. No long contract.	Rolling monthly

> **Pricing.** Every project is quoted at a fixed price for a written scope — not an hourly rate. Send the brief and you will have a number, a timeline and the exclusions in two working days.

TERMS

50% to start, 50% at launch

Half secures the slot and begins the work; the second half is due on launch, after you have seen the build running. Larger builds are split into three milestone payments.

What you get

Design files, the repository, and every account created for the project, in your name. Thirty days of fixes after launch, and a walkthrough of how to edit the site.

PROCESS

1 — Brief

A link, a document, or three sentences about what you need.

2 — Scope and quote

A written scope, timeline and fixed price within two working days.

3 — Design and build

A working link you can open every week. Progress as it is built.

4 — Launch and hand-off

Deploy, domain, walkthrough, and thirty days of fixes.
